

A REFRESHING DRINK EVERY TIME

Electronic Can and Bottle
Vending Machines

BOTTLES - CANS

FK RANGE

COLD DRINK VENDORS

Chutes

Using the flexible Sielaff chutes system, the FK-range can be supplied with combination of up to 10 standard or narrow chutes to accept products between 0.2 l and 2.0 l, depending on the machine type and the shape of selected drinks.

The mix of standard and narrow chutes enables optimum use of chilled area and ensures ideal capacities for primary and secondary brands.

Refrigeration

Electronically-controlled, high performance, push-in cooler unit.

The chiller unit may be programmed to a higher temperature during periods of inactivity, thereby saving energy.

Vending lines

The vending machine lines allow a concept in accordance with the location for everything that the consumer might desire for between-meal snacks. Sielaff offers the complete range of modern vending machines from only one manufacturer, i. e. be it hot, sweet, cold or fresh products, the vending machines offer everything the heart desires.

Cabinet width : 850 mm
Number of 0.5 Litre PET bottle chutes

Capacity : 172

7 chutes

6 choices

various capacities for main, secondary and third products

Cabinet width : 850 mm
Number of 0.50 Litre PET bottle chutes

Capacity : 186

6 identical chutes

5 choices with double capacity for main product

The concept

The FK-range from Sielaff is based on a concept of first-class innovation. By combining cabinets of different dimensions and door designs of a different specification, a modular system, which can be adapted for selection and capacity requirements has emerged. The individual standard and narrow chute system, which enables each chute to be adjusted to suit the individual product, complements the machine package, giving total flexibility. Each chute can be exchanged in minutes, should reconfiguration be required. Sielaff machines, built to last with low maintenance costs, are subjected to the most rigorous robotic vend testing and temperature checks under climate-controlled conditions.

FK-range: The flexible solution for vending bottles and cans

The machine pictured is in RAL 9005 (black)
 Kick plates and delivery pocket frame are in RAL 9005 (black)
 Stainless steel operator panel with additional lock protection = EC standard

The finest technology available

- SMD-vending machine controller with flash eeprom
- Electronically-controlled, high-performance, push-in cooling unit; optimised air circulation
- Internal door sealed all around
- Modular system is service and environment-friendly
- Machine base designed to facilitate transportation
- Internal master safety switch to disconnect mains electricity
- Coin slot and selection keypad are positioned at a suitable height for wheelchair users and children (130 cm).
- Machine sales and technical data, can be read out using a hand-held computer (MDC) via the IR-interface (EVA-DTS) next to the display, or remotely using a telemetry module

Optional Extras:

- SIELECTOR, Sielaff's own PC-software enables configuration and offers statistical readout from the vending machine. Software upgrades can also be performed using this programme. Four methods of sending and receiving data are possible (MDB-Bus, ISDN, GSM or infrared).
- Lock for cashbox or coin mechanism
- Bottle-opener

Increased level of protection against vandalism, theft and fraud

Additional security features (available as optional extras)

Coin insert slide

Coin return drum

Locking lever protection

Side lock

High security frame

Metal selection buttons
